My goal is simple: To help people who live in remote locations find a better solution to high speed internet. Whether you live in a location where traditional wired internet has never been established, travel the country in a RV, or have a cabin in a remote location, I can help keep you connected.

Is there a contract to sign? How long can I keep the service? No contract! No credit check! And you can keep the service for as many months/years as you'd like. If you ever decide to cancel, the device is yours to keep!

COST: \$155 for hardware which is yours to keep and take anywhere.

Hardware is the size of a cellphone and nothing more to install.

Monthly service is \$165 and includes 3 day FREE TRIAL at sign up for you to evaluate the service.
